MISAKI PREMIUM NMN 20,000mg (Blueberry & Honey) (In Progress)

☆Uniqueness:

Misaki Premium NMN has not only fundamental anti-aging efficacy, but also various other health benefits including, skin beautification, immunity enhancement, DNA gene repair. And adding polyphenols gives Misaki Premium NMN even more powerful benefits such as improving insomnia, relieving stress, reducing negative effects caused by irregular daily life cycle.

☆Efficacy:

Over 99% purity NMN is made in Japan!

Many NMN products are in the market now. And the amount and purity of NMN vary. Misaki Premium NMN uses NMN with over 99% purity, and each package contains 20,000mg of NMN.

Red wine is full of polyphenols!

Using red wine powder extracted from French wine gives Misaki Premium NMN big advantages over the others in the market. French wine contains various polyphenols. Polyphenols' benefits include anti-carcinogenic, anti-aging, reducing body burden, and regulating physiological functions. They are better than vitamins C and E as an antioxidant.

Manufactured at GMP-certified factory!

All the manufacturing processes are conducted at a GMP factory in Japan. Misaki Premium NMN is truly "Made In Japan."

Best Ingredients, Best Formulation

NMN(β -Nicotinamide Mononucleotide)

NMN is the ultimate anti-aging item. It acts on longevity genes called sirtuin to create a rejuvenating effect. Other benefits include skin beautification, DNA gene repair, and immunity enhancement are expected.

Trans-Resveratrol

Resveratrol has two types: trans- and cis- types. Study results show that the trans-resveratrol is more effective than the cis-type. Therefore, Misaki Premium NMN has the **trans-resveratrol**.

OPC(Oligomeric Proanthocyanidins)

The OPC is famous for anti-UV activity, anti-wrinkles, anti-inflammatory, and anti-oxidation. It also controls blood sugar and cholesterol levels to protect blood vessels, and promotes absorption of vitamin Cs and Es

Other Polyphenols (in Red Wine Powder)

Red wine powder also contains other polyphenols including tannins and anthocyanins. Polyphenols overall have strong anti- properties such as anti-oxidation (stronger than vitamin c) and anti-aging. They have the power to convert harmful substances such as active oxygen into harmless substances to prevent lifestyle-related diseases such as arteriosclerosis.
